

# U.S. Army Aviation Technical Test Center Maintenance and Support Services

The U.S. Army Aviation Technical Test Center (ATTC), and its affiliated contractors, have been maintaining, modifying, testing, and evaluating rotary and fixed wing aircraft for the U.S. Army since 1965. Recent changes in Army policy allow ATTC to provide support to federal, state, and local law enforcement agencies.

**ISO 9000 Certified**

Services include:

- All maintenance schedules (to include engine, transmission, and component replacement)
- Complete aircraft rewiring
